Access Water - working with Australian manufacturers committed to providing an extensive range of quality products to ensure your highest satisfaction

Rain Water Tanks (cont.)

UNDERGROUND (MATRIX)- This revolutionary system can be built to any capacity for a variety of catchment areas. Mostly used underground to harvest storm water, households can be water efficient without compromising on space or aesthetics.

This is a very popular choice, as the modules allow invisible water storage at low prices, and collect every drop of water in custom built underground tank.

Capacity: Individual units range between 31-119L

See what they say about us!

'Access Water use ethical standards in marketing, sales and the way they conduct their general business. We are proud to be associated with such a business partner.' -Flexdrive, tank manufacturer with AS4766 licence.

*'Everything went like clockwork from beginning to end . We are very happy, let the rain come!'
-Detmer, Beaumaris, VIC*

Solar Hot Water

DID YOU KNOW- ONE IN TWO Australian households are interested in solar hot water systems... where do you stand??

Invest in Solar Hot Water now, it would cost the same as a replacement electric water heater, AND would reduce the money you spend on gas/electricity bills. Combined with government rebate options available, you could save hundreds of \$\$\$!

We have a comprehensive range of quality solar hot water solutions to suit any household environment.

Solar Power- making more than just energy

Invest in a system that will supplement your household electricity needs all year round, and will pay for itself with surplus power grid connections. When connected to grid power the system converts solar energy into 240V AC electricity and this energy could help you cut down your electricity costs to just \$400 a year for a six-star rating home!

A typical 1.5 kW system could be yours for less than \$3000 after government rebates, and this could add many thousands to your property value.

Tank Pumps, Accessories and More..all in one place

PRESSURE PUMPS

DHJ800

- 800W power
- 60L/min
